

PRODUCT DATA SHEET

ELECTRIC VACUUM PUMP (EVP)

PRODUCT DESCRIPTION

It is an electric vacuum generating device whose function is to reduce the effort required when pressing the brake pedal. It provides vacuum assistance to the braking system, especially in vehicles with modern engines. Its lifespan—up to 500,000 braking cycles—is equivalent to approximately 200,000 km or between 8 and 10 years of use. It is known as an Electric Vacuum Pump (EVP).

FEATURES

Universal Compatibility: Suitable for gasoline, diesel, hybrid, and electric engines. **Efficiency:** Operates only when needed, reducing fuel consumption. **Reduces environmental impact:** Operates on demand and reduces CO₂ emissions. **Compact design:** Facilitates installation in various vehicle models. **Maintenance-free:** Features internal lubrication, without connection to the vehicle's oil circuit.

TYPE OF COMPATIBLE VEHICLES

Hybrids and electric vehicles | With stop-start system | With internal combustion engines with injectors | Diesel | With an engine that doesn't produce enough vacuum | With a turbo

Product tariff code: 84141089

TECHNICAL SPECIFICATIONS

AVERAGE POWER CONSUMPTION	MAXIMUM VACUUM LEVEL
< 10 A	86%
NOMINAL VOLTAGE	NOISE
12 - 14 V	70 dB

PACKAGING INFORMATION

BOX DIMENSIONS	WEIGHT (WITH BOX)
150x150x100 mm	1 - 1,1 kg
