

PRODUCT DATA SHEET

KEY SHELLS

PRODUCT DESCRIPTION

The key shell is an essential component for replacing or repairing damaged or worn vehicle key cases. Made from high-quality materials, this key shell offers a reliable and durable solution to restore the functionality of car keys. Its design allows for hassle-free installation, enabling users to have a restored and fully functional key as an alternative to the original part. This is a solution used for the repair and replacement of damaged or worn car key casings, or as an alternative for the aesthetic upgrade of vehicle keys.

MAIN FEATURES

Durable Material: Manufactured from tough, durable materials to ensure a long service life. **Universal Compatibility:** designed to fit a wide range of vehicle makes and models. **Easy Installation:** the housing comes ready to be assembled with the internal components of the existing key, no assembly tools required. **Ergonomic Design:** Shape and size designed to fit perfectly in the hand and provide a comfortable user experience. **Precise Buttons and Openings:** all buttons and openings are precisely designed to ensure easy access and optimal functionality.
